

Market, Sell & Transact Insurance FASTER

iPipeline has teamed up with RSA Security, a respected leader in security to provide the protection you need and can trust.

Utilizing iPipeline's PipePass solution, you will have the ability to control exactly who has access to your information to determine the level of protection you want.

■ Security Highlights

- ▶ **You control who can see what parts of your website through our powerful security tool.**
- ▶ **Instantly grant or deny access to users from anywhere at anytime through the easy to use, web-based self administration tool. You can change access and access levels at any time for any user.**
- ▶ **Give different levels of access. Do you have producers who only do one line of business? You can restrict them to that one part of your website or allow them to access everything. You can control it all.**
- ▶ **Different groups and groups of users may be set up to access parts of your site, customizing the data available to individual users.**
- ▶ **Minimal day-to-day maintenance. You only need to determine what access users should get and then you are all done. Users can reset their own passwords through a secure process instead of having to call you.**
- ▶ **Fully compatible with our all iPipeline's current offerings. LifePipe, AnnuityPipe and LTCPipe may all be restricted and controlled by PipePass.**

Interested in more than just security? Ask us about our full suite of web-based products :
