## Illustration Module

### MAXIMIZE YOUR SALES EFFECTIVENESS WITH iPIPELINE'S ILLUSTRATIONS

A Web-based or disconnected solution for forward-projecting Hypotheticals and In-force Illustration is the cornerstone of the iPipeline *Illustration Suite*. The *Illustration Module* supports your entire product line including Life Insurance, Annuities, Disability Income and Long Term Care.

#### Comprehensive Solutions

The *Illustration Module* gives producers the power to compare hundreds of solutions to a client's financial challenges, each with different feature and benefit configurations. Illustration combines life, annuity and health products into a single system. Producers enter data once, choose a potential product solution, add riders and then analyze the corresponding premiums instantly. Producers rapidly compare scenarios to find the best solution that meets the client's needs.

Comprehensive Output

#### Ease-of-Use

Our years of thought leadership has allowed us to make our *Illustration Module* both comprehensive and very easy to use at the same time. This is particularly important to your selling complex insurance products. We present information on screen in a visually appealing, limited clicks fashion, with a wealth of features built-in to help guide the producer toward the right illustration for the customer.

#### Customizable and Efficient

Changes to your products, riders, rates and calculations are inevitable. How fast you react to them is more important than ever. With the *Illustration Module*, your illustrations are truly custom designed for you...by you. Quickly and efficiently modify illustration inputs, outputs and calculations using our configuration toolset to keep existing products up-to-date, and to speed new ones to market.

**A Wealth of Features are Included in the *Illustration Component*, Facilitating Your Ease-of-Use and Maximizing Your Sales Effectiveness.**
