

LITWIRE™

WEB-BASED DATA REPOSITORY FOR FINANCIAL INSTITUTIONS

LitWire is a data aggregation repository designed for financial organizations with multiple partners which enables access to critical information for reporting and tracking. Information about clients, direct carrier relationships and vital distribution partners can now all be aggregated into one place to make your comprehensive reporting easier.

TRACK AND REPORT

Whether you need contact information, case status update, commission details or other case-related data, LitWire collects it for you. Information about clients, direct carrier relationships and vital distribution partners can now all be aggregated into one place to make your comprehensive reporting easier.

FEATURES

A self-sufficient, web-based environment

Detailed information on cases, commissions, hierarchies, product types, carriers and distribution partners

BENEFITS

Collect all policy and data from your distribution partners

Receive policy information from carriers to which you may submit applications directly

Access critical client information for internal and external contacts

Straightforward management for easy follow up and reminders

Mitigate risk by addressing compliance concerns
