

ALPHATRUST® e-SIGN

Flexible e-Signature and Document Process Automation

When conducting business in a digital world, you need a safe and flexible solution to not only deliver documents to clients electronically, but also have them signed quickly and securely. AlphaTrust e-Sign is an enterprise e-Signature solution that enables automation, ranging from simple send-a-document-for-signature to your most complex workflows.

AlphaTrust e-Sign is a fully-brandable, compliant eSignature and document-process automation solution that securely digitizes the creation of legally enforceable business records. Increase the efficiency of your daily workflow with AlphaTrust e-Sign through features like presenting disclosures, form filling, document approval, document and policy signature, and secure delivery.

KEEP YOUR BRAND IN THE SPOTLIGHT

iPipeline's white label e-Signature solution gives you full customization of your document delivery and e-Signature experience to continue promoting your brand through the entire sales process. AlphaTrust e-Sign allows you to easily modify the UX to perfectly match your application. Customize a signature block to use just the signature itself or add a variety of transaction details and customized branding – the entire user experience is in your hands!

COMPLIANCE IS KEY

Capturing an electronic signature on a document is simple, but to capture e-Signed documents that are legally enforceable, secure, and compliant is a complex feat. AlphaTrust e-Sign is fully compliant with North American, European and various Asia Pacific laws and regulations, making it the vendor of choice for businesses. This e-Signature solution provides compliance with specific industry standards and regulations, including those for insurance, financial services, banking and more.

OPTIMIZE STP (STRAIGHT THROUGH PROCESSING)

Not all e-Signature solutions are created equal. AlphaTrust e-Sign easily embeds into your existing applications to offer a seamless user experience – there's no need to jump out to another application to obtain signature when you're in the middle of the sales process; stay right where you are. And with seamless integration into iPipeline's iGO and DocFast, you can achieve total straight-through processing and an optimized selling experience.

UNIQUE FEATURES:

Complete customization and white-labeling to deliver an experience unique to your brand

Seamless integration into iGO and DocFast, or your preferred e-App and document delivery solutions

Robust Web Services APIs enabling fine-grained process control, security control, and event management

Easily integrates with front-end and back-end legacy and third-party systems

Extensible and pluggable architecture to meet your enterprise demands

One platform provides support for all three process approaches in the marketplace – integrated, stand-alone workflows, and ad-hoc send and sign

Ability to leverage iPipeline cloud-based deployment – on-premise option available

BENEFITS INCLUDE:

Ability to fully customize and deliver the ideal user experience to wow your customers

Offers complete workflows, security, control, and auditability

Provides national and international legal and regulatory compliance

Repeatable processes allow clients to leverage previous work
