iPipeline's DocFast® allows Carriers, Distributors, and Financial Institutions to transform a manual document delivery process into a secure, swift, and seamless digital experience. This solution allows for multiple users and workflows so that everyone in your distribution chain can electronically receive, review, and approve policies.

DocFast can digitally transform how you do business today by automating and accelerating business processing. This next-generation automation solution integrates with your existing e-App, illustrations, policy administration, and underwriting systems to support policy generation and e-Delivery. It's time to change our mindsets and get creative about how we exchange the information, while remaining our client's "trusted advisor".

FEATURES

- Send and receive documents via XML data pack
- Real-time dashboard reporting
- e-Signature capability
- e-Deliver to multiple clients
- Electronic payment options
- Multi-workforce capability

BENEFITS

- Reduce cycle times by an average of 23 days*
- Eliminate delivery cost by 78%*
- Increase placement potential by 6-8%*
- Improve quality, preventing policy re-issues
- Higher customer satisfaction
- Optimized for mobile

These are average numbers and are not indicative of definite future results.
